VOLUME 96, JANUARY–JUNE, 1955

TABLE OF CONTENTS

No. 1. JANUARY–FEBRUARY, 1955

PAGE

GARABED A. GARABEDIAN AND JEROME T. SYVERTON. Studies on herpes simplex virus. I. An antigenic analysis of four strains of virus isolated from a human subject 1

GARABED A. GARABEDIAN AND JEROME T. SYVERTON. Studies on herpes simplex virus. II. An affinity in vitro of herpes virus for rabbit microphages and macrophages 5

JEROME T. SYVERTON, GARABED A. GARABEDIAN, AND JACK FRIEDMAN. Studies on herpes simplex virus. III. The effects of roentgen radiation, cortisone and gastric mucin upon the infectivity of herpes simplex virus for laboratory mice 9

JOHN H. SCHWAB, DENNIS W. WATSON, AND WILLIAM J. CROMARTIE. Further studies of group A streptococcal factors with lethal and cardiotoxic properties 14

HENRY E. WEIMER, RUTH A. BOAK, CHARLES M. CARPENTER, JEAN REDLICH-MOSHIN, HELENE E. DRUSCH, AND JAMES N. MILLER. Serum glycoprotein studies in experimental brucellosis of the guinea pig 19

ELIZABETH UPTON, R. P. HANSON, D. DOW, AND C. A. BRANDLY. Intracerebral inoculation of mice with Newcastle disease virus. II. The response of mice of different ages 24

ELIZABETH UPTON, R. P. HANSON, AND C. A. BRANDLY. Intracerebral inoculation of mice with Newcastle disease virus. III. Serial passage of NDV in suckling mice 29

ERIC R. BROWN AND WILLIAM B. CHERRY. Specific identification of *Bacillus anthracis* by means of a variant bacteriophage 34

WILLIAM LESTER, JR. AND EDWARD W. DUNKLIN. Residual surface disinfection. I. The prolonged germicidal action of dried surfaces treated with orthophenylphenol 40

LOLITA PANNELL. The effect of surface active agents on the toxicity of *Pasteurella pestis* lysates 54

JAMES W. MOULDER, BETTY R. S. MCCORMACK, FRANK M. GOGOLAK, MARION M. ZEBOVITZ, AND MARGARET K. ITATANI. Production and properties of a penicillin-resistant strain of the feline pneumonitis virus 57

RONALD G. PETERSON AND STANLEY E. HARTSELL. The lysozyme spectrum of the gram-negative bacteria 75

K. GOODNER, LOLITA PANNELL, P. BARTELL, AND E. L. ROTHSTEIN. Toxic end products from *Pasteurella pestis*. I. A comparison of lysate toxin with that obtained from the action of bile salts 82

F. R. MCCRUMB, JR., S. MERCIER, T. H. CHEN, K. F. MEYER, AND K. GOODNER. Studies on the antibody patterns in pneumonic plague patients 88

JOSÉ OLIVER-GONZÁLEZ, PRESTON M. BAUMAN, AND A. S. BENENSON. Species specificity of the anti-egg precipitin in schistosome serums 95

MILA E. RINDGE. Note on the age and sex incidence of poliomyelitis 101

No. 2. MARCH–APRIL, 1955

JOSEPH S. INGRAHAM. Artificial radioactive antigens. III. S^{35}-sulfanil-azo-sheep red cell stromata; preparation and gross distribution in normal rabbits and mice 105

PAGE

JOSEPH S. INGRAHAM. Artificial radioactive antigens. IV. The fate of S^{35}-sulfanil-azo-sheep stromata in X-irradiated, immunized or splencetomized rabbits 118

JOSEPH S. INGRAHAM. A subfraction from rabbit liver mitochondria which retains a high concentration of radioactivity from S^{35}-sulfanil-azo-proteins. 129

R. HOLDENRIED AND HARVEY B. MORLAN. Plague-infected fleas from northern New Mexico wild rodents 133

N. JOEL EHRENKRANZ AND K. F. MEYER. Studies on immunization against plague. VIII. Study of three immunizing preparations in protecting primates against pneumonic plague 138

T. H. CHEN AND K. F. MEYER. Studies on immunization against plague. XI. A study of the immunogenicity and toxicity of eleven avirulent variants of virulent strains of *Pasteurella pestis* 145

MARIA G. STRONK AND MARGARET PITTMAN. The influence of pertussis vaccine on histamine sensitivity of rabbits and guinea pigs and on the blood sugar in rabbits and mice 152

RICHARD A. ORMSBEE, HAZEL PARKER, AND EDGAR G. PICKENS. The comparative effectiveness of aureomycin, terramycin, chloramphenicol, erythromycin, and thiocymetin in suppressing experimental rickettsial infections in chick embryos 162

F. E. PAYNE, A. LARSON, D. L. WALKER, L. FOSTER, AND K. F. MEYER. Studies on immunization against plague. IX. The effect of cortisone on mouse resistance to attenuated strains of *Pasteurella pestis* 168

DONALD A. ROWLEY AND MARGRET HUBER. Pathogenesis of experimental histoplasmosis in mice. I. Measurement of infecting dosages of the yeast phase of *Histoplasma capsulatum* 174

D. H. FERRIS, R. P. HANSON, R. J. DICKE, AND R. H. ROBERTS. Experimental transmission of vesicular stomatitis virus by diptera 184

SEYMOUR LEVINE, HEBER J. R. STEVENSON, ROBERT H. BORDNER, AND PHILIP R. EDWARDS. Typing of klebsiella by infrared spectrophotometry. 193

NO. 3. MAY–JUNE, 1955

WILLIAM H. TALIAFERRO AND TULIO PIZZI. Connective tissue reactions in normal and immunized mice to a reticulotropic strain of *Trypanosoma cruzi*. 199

W. J. NUNGESTER, VINCENT MOORE, LEONARD MIKA, AND PHEBE WILLIAMS SUMMERS. Comparative study of host resistance of guinea pigs and rats. I. Virulence of *Diplococcus pneumoniae* and *Bacillus anthracis* for guinea pigs and rats 227

MILES E. HENCH AND W. J. NUNGESTER. Comparative study of host resistance of guinea pigs and rats. II. Effect of guinea pig and rat serum of *Diplococcus pneumoniae* type I 232

BERNARD N. JAROSLOW. The effect of X irradiation on immunity of the mouse to *Trypanosoma duttoni* 242

GLEN R. GALE. The effects of β-propiolactone on the metabolism of *Candida albicans* 250

WILLIAM CANTRELL. The effects of cortisone and oxophenarsine on *Trypanosoma equiperdum* infections in the rat 259

ELLEN M. SIMON, M. SCOTT REDFEARN, AND DAVID T. BERMAN. Competitive values of smooth and mucoid *Brucella abortus* in mixed infections in mice. 268

GEORGE J. KASAI. A study of mediums for the growth and isolation of filamentous mouth organisms 279

H. SUGIYAMA AND G. M. DACK. Apyrase in partially purified staphylococcal enterotoxin 286

Index 295

GENERAL INDEX, VOLUME 96, NO. 1, 2, AND 3 (1955)

Bacillus anthracis, Specific identification of, by means of a variant bacteriophage, 34
Comparative study of host resistance of guinea pigs and rats, 227
Bacteriophage, Specific identification of *Bacillus anthracis* by means of a variant bacteriophage, 34
Bartell, P.: Toxic end products from *Pasteurella pestis*.
I. A comparison of lysate toxin with that obtained from the action of bile salts, 82
Bauman, Preston M.: Species specificity of the anti-egg precipitin in schistosome serums, 95
Benenson, A. S.: Species specificity of the anti-egg precipitin in schistosome serums, 95
Berman, David T.: Competitive values of smooth and mucoid *Brucella abortus* in mixed infections in mice, 268
Boak, Ruth A.: Serum glycoprotein studies in experimental brucellosis of the guinea pig, 19
Bordner, Robert H.: Typing of klebsiella by infrared spectrophotometry, 193
Brandly, C. A.: Intracerebral inoculation of mice with Newcastle disease virus.
II. The response of mice of different ages, 24
III. Serial passage of NDV in suckling mice, 29
Brown, Eric R.: Specific identification of *Bacillus anthracis* by means of a variant bacteriophage, 34
Brucella abortus, Competitive values of smooth and mucoid, in mixed infections in mice, 268
Brucellosis, Serum glycoprotein studies in experimental brucellosis of the guinea pig, 19

Candida albicans, The effects of β-propiolactone on the metabolism of, 250
Cantrell, William: The effects of cortisone and oxophenarsine on *Trypanosoma equiperdum* infections in the rat, 259
Carpenter, Charles M.: Serum glycoprotein studies in experimental brucellosis of the guinea pig, 19
Chen, T. H.: Studies on the antibody patterns in pneumonic plague patients, 88
Studies on immunization against plague.
XI. A study of the immunogenicity and toxicity of eleven avirulent variants of virulent strains of *Pasteurella pestis*, 145
Cherry, William B.: Specific identification of *Bacillus anthracis* by means of a variant bacteriophage, 34
Cromartie, William J.: Further studies of group A streptococcal factors with lethal and cardiotoxic properties, 14

Dack, G. M.: Apyrase in partially purified staphylococcal enterotoxin, 286
Dicke, R. J.: Experimental transmission of vesicular stomatitis virus by diptera, 184
Diplococcus pneumoniae, Comparative study of host resistance of guinea pigs and rats, 227, 232
Disinfection, Residual surface disinfection, 40
Drusch, Helene E.: Serum glycoprotein studies in experimental brucellosis of the guinea pig, 19
Dunklin, Edward W.: Residual surface disinfection.
I. The prolonged germicidal action of dried surfaces treated with orthophenylphenol, 40

Edwards, Philip R.: Typing of klebsiella by infrared spectrophotometry, 193
Ehrenkranz, N. Joel: Studies on immunization against plague.
VIII. Study of three immunizing preparations in protecting primates against pneumonic plague, 138

Ferris, D. H.: Experimental transmission of vesicular stomatitis virus by diptera, 184
Foster, L.: Studies on immunization against plague.
IX. The effect of cortisone on mouse resistance to attenuated strains of *Pasteurella pestis*, 169
Friedman, Jack: Studies on herpes simplex virus.
III. The effects of roentgen radiation, cortisone and gastric mucin upon the infectivity of herpes simplex virus for laboratory mice, 9

Gale, Glen R.: The effects of β-propiolactone on the metabolism of *Candida albicans*, 250
Garabedian, Garabed A.: Studies on herpes simplex virus.
I. An antigenic analysis of four strains of virus isolated from a human subject, 1
II. An affinity in vitro of herpes virus for rabbit microphages and macrophages, 5
III. The effects of roentgen radiation, cortisone and gastric mucin upon the infectivity of herpes simplex virus for laboratory mice, 9
Gogniak, Frank M.: Production and properties of a penicillin-resistant strain of feline pneumonitis virus, 57
Goodner, K.: Toxic end products from *Pasteurella pestis*.
I. A comparison of lysate toxin with that obtained from the action of bile salts, 82
Studies on the antibody patterns in pneumonic plague patients, 88

Hanson, R. P.: Intracerebral inoculation of mice with Newcastle disease virus.
II. The response of mice of different ages, 24
III. Serial passage of NDV in suckling mice, 29
Experimental transmission of vesicular stomatitis virus by diptera, 184
Hartsell, Stanley E.: The lysozyme spectrum of the gram-negative bacteria, 75
Hench, Miles E.: Comparative study of host resistance of guinea pigs and rats.
II. Effect of guinea pig and rat serum on *Diplococcus pneumoniae* type I, 232
Herpes simplex virus, Studies on, 1, 5, 9
Histoplasmosis, Pathogenesis of experimental histoplasmosis in mice, 174
Holdenreid, R.: Plague-infected fleas from northern New Mexico wild rodents, 133
Huber, Margret: Pathogenesis of experimental histoplasmosis in mice.
I. Measurement of infecting dosages of the yeast phase of *Histoplasma capsulatum*, 174

Ingraham, Joseph S.: Artificial radioactive antigens.
III. S^{35}-sulfanil-azo-sheep red cell stromata; preparation and gross distribution in normal rabbits and mice, 105
IV. The fate of S^{35}-sulfanil-azo-sheep stromata in X-irradiated, immunized or splenectomized rabbits, 118
A subfraction from rabbit liver mitochondria which retains a high concentration of radioactivity from S^{35}-sulfanil-azo-proteins, 129
Itatani, Margaret K.: Production and properties of a penicillin-resistant strain of feline pneumonitis virus, 57

Jaroslow, Bernard N.: The effect of X irradiation on immunity of the mouse to *Trypanosoma duttoni*, 242

Kasai, George J.: A study of mediums for the growth and isolation of filamentous mouth organisms, 279
Klebsiella, Typing of, by infrared spectrophotometry, 193

Larson, A.: Studies on immunization against plague.
IX. The effect of cortisone on mouse resistance to attenuated strains of *Pasteurella pestis*, 168
Lester, William, Jr.: Residual surface disinfection.
I. The prolonged germicidal action of dried surfaces treated with orthophenylphenol, 40
Levine, Seymour: Typing of klebsiella by infrared spectrophotometry, 193
Lysozyme spectrum, of the gram-negative bacteria, 75

McCormack, Betty R. S.: Production and properties of a penicillin-resistant strain of feline pneumonitis virus, 57
McCrumb, F. R., Jr.: Studies on the antibody patterns in pneumonic plague patients, 88
Meyer, K. F.: Studies on the antibody patterns in pneumonic plague patients, 88
Studies on immunization against plague.
VIII. Study of three immunizing preparations in protecting primates against pneumonic plague, 138
XI. A study of the immunogenicity and toxicity of eleven avirulent variants of virulent strains of *Pasteurella pestis*, 145
IX. The effect of cortisone on mouse resistance to attenuated strains of *Pasteurella pestis*, 168
Mika, Leonard: Comparative study of host resistance of guinea pigs and rats.
I. Virulence of *Diplococcus pneumoniae* and *Bacillus anthracis* for guinea pigs and rats, 227
Miller, James N.: Serum glycoprotein studies in experimental brucellosis of the guinea pig, 19
Moore, Vincent: Comparative study of host resistance of guinea pigs and rats.
I. Virulence of *Diplococcus pneumoniae* and *Bacillus anthracis* for guinea pigs and rats, 227
Morlan, Harvey B.: Plague-infected fleas from northern New Mexico wild rodents, 133
Moulder, James W.: Production and properties of a penicillin-resistant strain of feline pneumonitis virus, 57

Newcastle disease virus, Intracerebral inoculation of mice with, 24, 29
Nungester, W. J.: Comparative study of host resistance of guinea pigs and rats.
I. Virulence of *Diplococcus pneumoniae* and *Bacillus anthracis* for guinea pigs and rats, 227

II. Effect of guinea pig and rat serum in *Diplococcus pneumoniae* type I, 232

Oliver-González, José: Species specificity of the anti-egg precipitin in schistosome serums, 95
Oral bacteria, A study of mediums for the growth and isolation of filamentous mouth organisms, 279
Ormsbee, Richard A.: The comparative effectiveness of aureomycin, terramycin, chloramphenicol, erythromycin, and thiocymetin in suppressing experimental rickettsial infections in chick embryos, 162

Pannell, Lolita: The effect of surface active agents on the toxicity of *Pasteurella pestis* lysates, 54
Toxic end products from *Pasteurella pestis*.
I. A comparison of lysate toxin with that obtained from the action of the bile salts, 82
Parker, Hazel: The comparative effectiveness of aureomycin, terramycin, chloramphenicol, erythromycin, and thiocymetin in suppressing experimental rickettsial infections in chick embryos, 162
Pasteurella pestis, The effect of surface active agents on the toxicity of *Past. pestis* lysates, 54
Toxic end products from, 82
Studies on immunization against plague, 145, 168
Payne, F. E.: Studies on immunization against plague.
IX. The effect of cortisone on mouse resistance to attenuated strains of *Pasteurella pestis*, 168
Pertussis, The influence of pertussis vaccine on histamine sensitivity of rabbits and guinea pigs and on the blood sugar in rabbits and mice, 152
Peterson, Ronald G.: The lysozyme spectrum of the gram-negative bacteria, 75
Pickens, Edgar G.: The comparative effectiveness of aureomycin, terramycin, chloramphenicol, erythromycin, and thiocymetin in suppressing experimental rickettsial infections in chick embryos, 162
Pittman, Margaret: The influence of pertussis vaccine on histamine sensitivity of rabbits and guinea pigs and on the blood sugar in rabbits and mice, 152
Pizzi, Tulio: Connective tissue reactions in normal and immunized mice to a reticulotropic strain of *Trypanosoma cruzi*, 199
Plague, Studies on the antibody patterns in pneumonic plague patients, 88
Plague-infected fleas from northern New Mexico wild rodents, 133
Studies on immunization against plague, 138, 145, 168
Pneumonitis, Production and properties of a penicillin-resistant strain of feline pneumonitis virus, 57
Poliomyelitis, Note on the age and sex incidence of, 101

Radioactive antigens, Artificial, 105, 118
A subfraction from rabbit liver mitochondria which retains a high concentration of radioactivity from S^{35}-sulfanil-azo-proteins, 129
Redfearn, M. Scott: Competitive values of smooth and mucoid *Brucella abortus* in mixed infections in mice, 269
Redlich-Moshin, Jean: Serum glycoprotein studies in experimental brucellosis of the guinea pig, 19
Rickettsia, The comparative effectiveness of aureomycin, terramycin, chloramphenicol, erythromycin, and thiocymetin in suppressing experimental rickettsial infections in chick embryos, 162
Rindge, Mila E.: Note on the age and sex incidence of poliomyelitis, 101
Roberts, R. H.: Experimental transmission of vesicular stomatitis virus by diptera, 184
Rothstein, E. L.: Toxic end products from *Pasteurella pestis*.
I. A comparison of lysate toxin with that obtained from the action of bile salts, 82
Rowley, Donald A.: Pathogenesis of experimental histoplasmosis in mice.
I. Measurement of infecting dosages of the yeast phase of *Histoplasma capsulatum*, 174

Schistosomes, Species specificity of the anti-egg precipitin in schistosome serums, 95
Schwab, John H.: Further studies of group A streptococcal factors with lethal and cardiotoxic properties, 14
Simon, Ellen M.: Competitive values of smooth and mucoid *Brucella abortus* in mixed infections in mice, 268
Staphylococci, Apyrase in partially purified staphylococcal enterotoxin, 286
Stevenson, Heber J. R.: Typing of klebsiella by infrared spectrophotometry, 193
Streptococci, Further studies of group A streptococcal factors with lethal and cardiotoxic properties, 14
Stronk, Maria G.: The influence of pertussis vaccine on histamine sensitivity of rabbits and guinea pigs and on the blood sugar in rabbits and mice, 152
Sugiyama, H.: Apyrase in partially purified staphylococcal enterotoxin, 286
Summers, Phebe Williams: Comparative study of host resistance of guinea pigs and rats.
I. Virulence of *Diplococcus pneumoniae* and *Bacillus anthracis* for guinea pigs and rats, 227
Syverton, Jerome T.: Studies on herpes simplex virus.
I. An antigenic analysis of four strains of virus isolated from a human subject, 1
II. An affinity in vitro of herpes virus for rabbit microphages and macrophages, 5
III. The effects of roentgen radiation, cortisone and gastric mucin upon the infectivity of herpes simplex virus for laboratory mice, 9

Taliaferro, William H.: Connective tissue reactions in normal and immunized mice to a reticulotropic strain of *Trypanosoma cruzi*, 199
Trypanosoma cruzi, Connective tissue reactions in normal and immunized mice to a reticulotropic strain of, 199
Trypanosoma duttoni, The effect of X irradiation on immunity of the mouse to, 242
Trypanosoma equiperdum, The effects of cortisone and oxophenarsine on *T. equiperdum* infections in the rat, 259

Upton, Elizabeth: Intracerebral inoculation of mice with Newcastle disease virus.
II. The response of mice of different ages, 24
III. Serial passage of NDV in suckling mice, 29

Vesicular stomatis virus, Experimental transmission of, by diptera, 184

Walker, D. L.: Studies on immunization against plague.
IX. The effect of cortisone on mouse resistance to attenuated strains of *Pasteurella pestis*, 168
Watson, Dennis W.: Further studies of group A streptococcal factors with lethal and cardiotoxic properties, 14
Weimer, Henry E.: Serum glycoprotein studies in experimental brucellosis of the guinea pig, 19

X ray, The effect of X irradiation on immunity of the mouse to *Trypanosoma duttoni*, 242

Zebovitz, Marion M.: Production and properties of a penicillin-resistant strain of feline pneumonitis virus, 57

TABLE OF CONTENTS

No. 1. JULY–AUGUST, 1955

PAGE

MAKIO MURAYAMA. Comparative study of host resistance of guinea pigs and rats. IV. The effect of bacterial fractions on the adenosinetriphosphatase activity of the guinea pig and the rat leucocyte nuclei-free homogenate... 1

DORA A. HENLEY AND WALTER J. NUNGESTER. Comparative study of host resistance of guinea pig and rat. III. Pneumococcidal extracts from the liver and spleen of the susceptible rat and the resistant guinea pig..... 8

IRA SINGER, RITA HADFIELD, AND MARITA LAKONEN. The influence of age on the intensity of infection with *Plasmodium berghei* in the rat..... 15

LEON LIBENSON AND ALICE P. MCILROY. On the mechanism of the Gram stain.. 22

DONALD A. ROWLEY AND MARGARET HUBER. Pathogenesis of experimental histoplasmosis in mice. II. Comparison of the intravenous and intraperitoneal routes of infection; comparison of the pathogenicity of four strains of *Histoplasma capsulatum*..... 27

JOSEPH SERONDE, JR., LOIS M. ZUCKER, AND THEODORE F. ZUCKER. The influence of duration of pantothenate deprivation upon natural resistance of rats to a corynebacterium..... 35

MORTON HAMBURGER, KENNETH L. CLARK, J. PARK BIEHL AND LOUIS P. JERVEY, JR. Studies in experimental meningitis in rhesus monkeys. I. The pathogenic effect of various bacteria recovered from human cases..... 39

MAXWELL FINLAND AND MILDRED W. BARNES. Laboratory experiences with influenza in Boston during the winter 1949–50..... 48

ROLF FRETER. The fatal enteric cholera infection in the guinea pig, achieved by inhibition of normal enteric flora..... 57

JAMES W. MANDIA. The position of *Clostridium tetani* within the serological schema for the proteolytic clostridia..... 66

FRANKLIN A. NEVA AND JOHN C. SNYDER. Studies on the toxicity of typhus rickettsiae. III. Observations on the mechanism of toxic death in white mice and white rats..... 73

WILLIAM H. TALIAFERRO AND DAVID W. TALMAGE. Absence of amino acid incorporation into antibody during the induction period..... 88

No. 2. SEPTEMBER–OCTOBER, 1955

WILLIAM H. TALIAFERRO AND LUCY GRAVES TALIAFERRO. Reactions of the connective tissue in chickens to *Plasmodium gallinaceum* and *Plasmodium lophurae*. I. Histopathology during initial infections and superinfections.. 99

JAMES W. MOULDER AND WILLIAM H. TALIAFERRO. Reactions of the connective tissue in chickens to *Plasmodium gallinaceum* and *Plasmodium lophurae*. II. Glucose metabolism during initial infections..... 137

ANTHONY J. LUZZIO AND JOHN O. HARRIS. Proteolytic activities of certain members of the genus *Corynebacterium*..... 143

S. FAINE AND W. J. KAIPAINEN. Erythromycin in experimental leptospirosis. 146

GEORGE JOHN JACKSON. The effect of cortisone on *Plasmodium berghei* infections in the white rat..... 152

JAN SCHWARZ, EULA BINGHAM, EDWIN S. ROBBINS, AND SALVADOR M. ADRIANO. Experimental histoplasmosis in mice, and pregnancy..... 160

PAGE

J. Frederick Bell, Cora R. Owen, and Carl L. Larson. Virulence of *Bacterium tularense*. I. A study of the virulence of *Bacterium tularense* in mice, guinea pigs, and rabbits 162

Cora R. Owen, J. Frederick Bell, Carl L. Larson, and Richard A. Ormsbee. Virulence of *Bacterium tularense*. II. Evaluation of criteria of virulence of *Bacterium tularense* 167

Robert M. Lewert and Chang Ling Lee. Studies on the passage of helminth larvae through host tissues. III. The effects of *Taenia taeniaeformis* on the rat liver as shown by histochemical techniques 177

Irving G. Kagan and David R. Meranze. The histopathology of immune and normal mouse skin exposed to cercariae of *Schistosomatium douthitti* (Trematoda: Schistosomatidae) 187

Alden K. Boor. An antigen prepared in vitro effective for immunization against anthrax. I. Preparation and evaluation of the crude protective antigen ... 194

Alden K. Boor and Hugh B. Tresselt. An antigen prepared in vitro effective for immunization against anthrax. II. Concentration of the protective antigen by chemical fractionation 203

Hugh B. Tresselt and Alden K. Boor. An antigen prepared in vitro effective for immunization against anthrax. III. Immunization of monkeys against anthrax 207

Kenneth F. Burns and Charles J. Farinacci. Rabies in nonsanguivorous bats of Texas 211

S. Nani, J. S. Hollis, and W. C. Reeves. The action of hyaluronidase enzyme on St. Louis and western equine encephalitis viruses in the chick embryo. 219

No. 3. November–December, 1955

W. D. Winter, Jr. and G. E. Foley. Failure of *Candida stellatoidea* to quality as a species 227

Francis W. Hughes and Arthur L. Tatum. The effects of hypoxia on infections with *Plasmodium cathemerium* 231

Rolf Freter. The serologic character of cholera vibrio mucinase 238

Kenneth Goodner. Toxic end products from *Pasteurella pestis*. II. Toxin yields as influenced by conditions of growth 246

David Gale and Charles A. Waldron. Experimental actinomycosis with *Actinomyces israeli*. The development of visceral actinomycosis 251

E. M. Wood, W. T. Yasutake, and W. L. Lehman. A mycosis-like granuloma of fish 262

Gow T. Lam, R. J. Mandle, and K. Goodner. The effect of *Vibrio comma* mucinase upon the permeability of mouse intestine 268

Theodor von Brand and Moises Agosin. The utilization of Krebs cycle intermediates by the culture forms of *Trypanosoma cruzi* and *Leishmania tropica* 274

Mary E. McClain and Stewart H. Madin. Experimental studies on vesicular stomatitis virus. I. Factors influencing infectivity titrations in the chick embryo 280

Stewart A. Koser and Joan L. Thomas. Amino acid requirements of oral lactobacilli 287

Louis P. Jervey, Jr., Kenneth L. Clark, David G. Freiman, and Morton Hamburger. Studies in experimental meningitis in rhesus monkeys. II. The importance of streptodornase in the enzymatic digestion in vitro of experimentally produced meningeal exudate 299

Kenneth L. Clark, Louis P. Jervey, Jr., David G. Freiman, and Morton Hamburger. Studies in experimental meningitis in rhesus monkeys. III. The effect of intracisternal injection of streptokinase and streptodornase on the exudate of experimental meningitis 305

Lorraine Friedman, C. E. Smith, and L. E. Gordon. The assay of virulence of coccidioides in white mice 311

Index 317

GENERAL INDEX, VOLUME 97, NO. 1, 2, AND 3 (1955)

Actinomyces israeli, Experimental actinomycosis with, 251
Adriano, Salvador M.: Experimental histoplasmosis in mice, and pregnancy, 160
Agosin, Moises: The utilization of Krebs cycle intermediates by the culture forms of *Trypanosoma cruzi* and *Leishmania tropica*, 274
Amino acids, Absence of amino acid incorporation into antibody during the induction period, 88
Amino acid requirements of oral lactobacilli, 287
Anthrax, An antigen prepared in vitro effective for immunization against, 194, 203, 207
Antibody, Absence of amino acid incorporation into, during the induction period, 88

Bacterium tularense, Virulence of, 162, 167
Barnes, Mildred W.: Laboratory experiences with influenza in Boston during the winter 1949–50, 48
Bell, J. Frederick: Virulence of *Bacterium tularense*.
I. A study of the virulence of *Bact. tularense* in mice, guinea pigs, and rabbits, 162
II. Evaluation of criteria of virulence of *Bact. tularense*, 167
Biehl, J. Park: Studies in experimental meningitis in rhesus monkeys.
I. The pathogenic effect of various bacteria recovered from human cases, 39
Bingham, Eula: Experimental histoplasmosis in mice, and pregnancy, 160
Boor, Alden K.: An antigen prepared in vitro effective for immunization against anthrax.
I. Preparation and evaluation of the crude protective antigen, 194
II. Concentration of the protective antigen by chemical fractionation, 203
III. Immunization of monkeys against anthrax, 207
Burns, Kenneth F.: Rabies in nonsanguivorous bats of Texas, 211

Candida stellatoides, Failure of, to qualify as a species, 227
Cholera, The fatal enteric cholera infection in the guinea pig, achieved by inhibition of normal enteric flora, 57
The serologic character of cholera vibrio mucinase, 238
Clark, Kenneth L.: Studies in experimental meningitis in rhesus monkeys.
I. The pathogenic effect of various bacteria recovered from human cases, 39
II. The importance of streptodornase in the enzymatic digestion in vitro of experimentally produced meningeal exudate, 299
III. The effect of intracisternal injection of streptokinase and streptodornase on the exudate of experimental meningitis, 305
